Advanced Properties

Use the **Advanced** tab to configure the conversion options, specify the size of an interaction and edit settings to control Flash and HTML5 playback.

Content Properties	
Fit to window	Scales the interaction up to fit the entire screen area of your browser.
Size	Width and height of the output interaction.

HTML5 Properties	
Extended audio and video compatibility	Check this option to turn on audio and video compatibility with Firefox and Opera browsers. If this option is checked, iSpring Visuals will generate additional audio and video files for Firefox and Opera browsers. **Note:** Enabling this option will increase the final size of the HTML5 interaction.

Flash Movie Properties	
Frame rate	The number of Flash frames per second. Low FPS is not recommended, because this can cause flickering in animations.
Disable Flash menu	Disables the right-click menu and top menu in a generated Flash movie window.
Disable "Print" option	Select this option if you don't want to allow the printing of your output Flash interaction. 'Print' option in the right-click menu will be disabled in the generated Flash file.

HTML5 Properties are disabled if you publish your presentation to Flash. Flash Movie Properties are disabled when publishing Presentation to HTML5.
