

Preview Interactions

You can see a live preview of your interaction and test it before publishing it to Flash and HTML5.

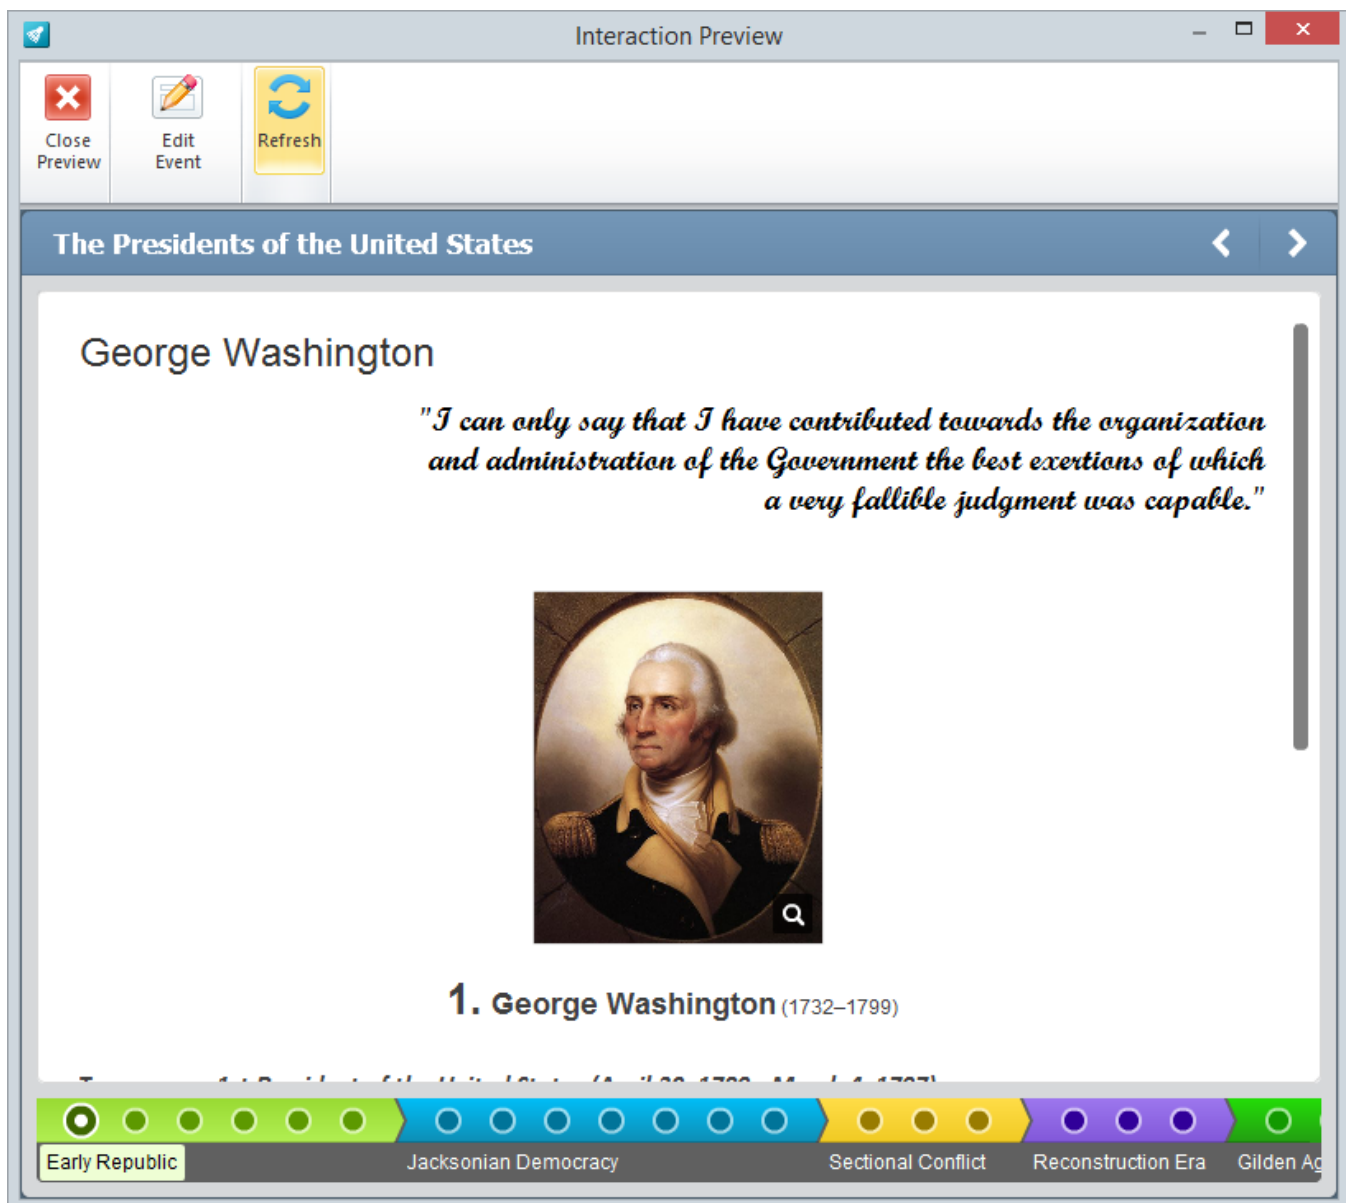

To open the **Preview** window, click the **Preview** button on the toolbar.

Or you can right-click an item on the left-hand side pane and choose **Preview** from the drop-down menu.

[blocked URL](#)

Interaction preview will be displayed in a new window.

You can easily get back and continue editing your interaction by clicking the **Edit Event** button or closing the **Preview** window.
