# Inserting Characters

Vitalize your content by adding characters. In iSpring Suite you'll find characters for a variety of topics: business, casual, industrial and medical spheres.

- Adding characters to a slide
- Changing characters
- Get More Characters

Adding characters to a slide

To add a character to a slide, do the following:

1. Click the **Character** button on the ribbon.
2. Choose a character from the list.
3. Choose the pose needed.

4. Click the **Insert** button.

The character you have chosen will be inserted into the slide. You can change the size of the image, place, rotate, flip or crop it the way you like.

> ✓ To find the image needed, use the search option. Type in the name, keyword or pose in the **Search** field. When you apply the filter, the objects meeting the specified sorting conditions will be displayed.

Changing characters

To change the pose of the inserted character, do the following:

1. Choose the character on the slide
2. Click the **Character** button on the ribbon.
3. Choose the pose needed.
4. Click the **Insert** button.
5. The image will be replaced with a new one.

Get More Characters

If you need more characters to fully reflect your ideas, you can download more characters from our partners' website or create a new character with iSpring Character Wizard.
