

Publishing to YouTube

With the **Publish to YouTube** option, you can put your PowerPoint presentations on YouTube right from the iSpring publishing window. No need to save a video to your computer: just sign in to your account right there and click Publish.

The image shows the 'Publish Presentation' window in iSpring Pro. The window has a blue header with the iSpring Pro logo. On the left is a sidebar with icons for Web, CD, iSpring Cloud, iSpring Learn, LMS, and Video. The main area has two tabs: 'General' and 'Compression'. The 'General' tab is active, showing fields for Destination (YouTube), Account (Sign In), Video profile (High Definition 720p), Video Information (Title: PowerPoint to HTML5 Excellence, Description, Category: Education, Permission: Public), Slide Range (All slides), and Playback Options (Seconds to spend on each slide: 5.0). At the bottom are buttons for Import/Export, Publish, and Cancel.

See the step-by-step instructions for uploading a video presentation to YouTube below:

1. Choose **YouTube** in the Destination field
2. Click **Sign In** in the Account field. You will see a window where you can enter your YouTube account details.

- Enter the Email address and pass that you usually sign in with.
If you don't have a YouTube account, sign up for YouTube and create your personal channel. Please read the article [Create an account on YouTube](#) for more details.
3. Click **Sign In**. When you enter your account details, iSpring validates this data, and you will see your YouTube account info in the **Account** field.
 4. Select a **video profile** depending on the device type

5. Change **Video Information**: title, description, category
6. Choose viewing **permissions** for a video file: public, private, and unlisted

Permission:	Public (anyone can search and view) ▼
	Public (anyone can search and view)
	Private (only specific YouTube users can view)
	Unlisted (can only be accessed by direct link)
Slide Range	

7. Specify the time to spend on a slide in the **Playback Options**

-  If you selected individual slide timings and set the automatic playback of the animation effects for your PowerPoint presentation, these settings will be preserved in the resulting video file. You can select different timing properties for each particular slide in PowerPoint. It's recommended to use the following settings if your presentation contains animations and transitional effects:
- Change the start option for each animation effect on the Animations tab: choose 'Start With Previous' and 'Start After Previous'
 - Set the Duration and Delay options of each effect (if necessary)
 - Select the 'On Mouse Click' check box on the Transitions tab to advance the slide when you click the mouse

8. Click **Publish to convert your presentation to a video file and upload it to YouTube.**

Pay attention to the recommendations list that you'll see in the pop up window after you click Publish.

×

Recommendations

For best results, please do the following:

- 1) Close any open programs to provide higher performance.
- 2) Stop audio playback in other programs, otherwise it will be recorded in the video.
- 3) Don't use PowerPoint until the publishing process is finished.

Publishing process may take a while depending on PowerPoint presentation duration and complexity, your computer performance etc.
During the conversion you may hear embedded audio.

Click OK to start publishing.

☐ Don't remind me again

OK

Once publishing is finished, the video processing window will automatically pop up. Next, you can go to your video channel, and manage your video in the Video Manager of your YouTube account.
