

Embed Code

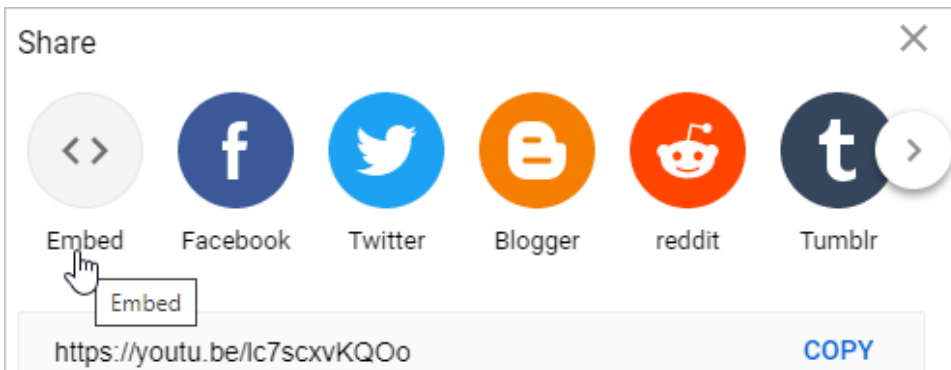

The second way to add a video to an article is by inserting an embed code.

Embed code is generated by a third-party website such as YouTube. Users can embed multimedia elements, such as YouTube videos, into their site. Let's see how to copy embed code from a YouTube video:

1. Locate a video on YouTube and click **Share**.

2. In the opened window, click **Embed**.

3. Next, click **Copy**. The embed code is copied and you can now insert it into your page.

Embed Video

X

```
<iframe width="560" height="315"
src="https://www.youtube.com/embed/
lc7scxvKQ0o" frameborder="0"
allow="accelerometer; autoplay;
encrypted-media; gyroscope;
picture-in-picture"
allowfullscreen></iframe>
```
