

Getting a List of Enrollments

AVAILABLE WITH BUSINESS SUBSCRIPTION

Method: `getEnrollments`

You can get a list of enrollments for the entire account, for certain learners, for certain courses, or for both latter parameters.

Permissions to Run the Request

Account Owner, Account Administrators, Department Administrators, Publishers, or [custom roles](#).

Department Administrators, Publishers, and users with a custom role can get information about enrollments assigned to users from the departments they manage and their sub-departments.

Parameters

Parameter	Type	Description
token (required)	string	Access token. You can obtain a token by making a request .
courseIds (optional)	array	The IDs of the courses which enrollments you would like to get.
learnerIds (optional)	array	The IDs of the users whose enrollments you would like to get.

Return Value

After the request has been successfully processed, the system returns an object with the following properties:

Parameter	Type	Description
enrollment	array	An array containing the xml data with the following values: enrollmentId, courseId, accessDate, dueDate, expirationDate, shouldLockAfterDueDate.
enrollmentId		The ID of the enrollment.
courseId		The ID of the course.
learnerId		The ID of the user enrolled in the course
accessDate		The date the learner is supposed to start studying the course.
dueDate		Course completion date. This parameter appears in the response if a due date is specified.
expirationDate		Course completion date. This parameter appears in the response if a due date is specified and shouldLockAfterDueDate is equal to 1.
shouldLockAfterDueDate		Possible values: 0 means that access is granted. 1 means that access is denied.
issuedCertificateId		The certificate ID (token) from the list of enrollments.
certIssueDate	date	The date the certificate was issued.
certExpiryDate	date	The certificate's expiration date.
enrollmentTypeGroup	int32	Possible values: 0 — assigned by an administrator 1 — added from the catalog

The date of issue and expiration of the certificate can only be received for active enrollments. When using this method, you cannot get the data for archived or deleted enrollments.

Sample Call

```
<?xml version="1.0" encoding="utf-8"?>
<SOAP-ENV:Envelope xmlns:SOAP-ENV="https://schemas.xmlsoap.org/soap/envelope/"
