

Hiding Slides

You can mark any slide as hidden by clicking the **Hide Slide** button on the toolbar or double clicking its thumbnail.

Hidden slides are not displayed in the outline of the player. They are skipped during presentation playback. Please note that hidden slides still exist in your presentation and can be accessed using hyperlinks or action buttons on the other slides.

The screenshot shows the 'Presentation Explorer' window with a toolbar at the top. The toolbar includes buttons for 'Save & Close', 'Hide Slide', 'Promote', 'Demote', 'On-Click', 'Auto', 'Branching', and 'Lock'. The 'Hide Slide' button is highlighted with a red circle. Below the toolbar is a table of slides. Slide 2 is highlighted in blue and has a 'hidden' label on its thumbnail. Two callouts are present: one pointing to the 'Hide Slide' button with the text 'Click 'Hide Slide' to hide/show the selected slides', and another pointing to the thumbnail of slide 2 with the text 'Double-click a slide thumbnail to hide/show a slide'.

#	Title	Advance	Branching	Lock	Presenter	Layout
