Record Video

You can record a video narration for your presentation using a web camera.

To record video with your camera, click the **Record Video** on the toolbar.

The Record panel will appear in the middle of the screen.

Follow the instructions below to record a video voice-over and sync it with your presentation:

1. You can place the cursor to the position from which you want to start the recording process using the **Slide Back/Forward** buttons on the Record panel.
2. If you want to record video for one slide only, select the **Process current slide only** checkbox.
3. Click the **Start Record** button.
   Your presentation will start playing. Now, you can record your video narration and sync animations on-the-fly. The Start Record button will be replaced with the **Next Slide/Next Animation/Skip Transition** buttons depending on the coming element in your presentation.
4. Click the **Next Slide/Next Animation/Skip Transition** button in the appropriate moments. When there are no more animations and slides left in your presentation, the Start Record button will be replaced with the Stop button.
5. Click the **Stop** button.
6. Click **Done** to save your video recording and quit the Record mode.
   or
   Click **Cancel** to discard your video recording.
