Adjusting Duration of Slides and Transitions

You can move borders between slides to adjust slide duration.

To move a slide border:

- Drag the border left or right.
  or
- Move the cursor on the timeline to the position where you want the presentation to switch to the next slide and then click **Set Next Slide** on the toolbar.

Duration of the other slides in your presentation won't be affected. However, if you want to move a given slide border without changing positions of the other borders, hold down the **Shift** button on your keyboard and then drag a border.

You can also move on-slide animations and transitions the same way.
