

Randomizing Question Groups

The final quiz can include all question groups or a certain number of randomly sorted groups.

To set randomizing:

1. Go to **Quiz Properties -> Navigation -> Question Pool**
2. Select between two options:
 - Include all groups from the quiz
 - Select random groups

The screenshot shows the 'Quiz Properties' dialog box with the 'Navigation' tab selected. The 'Question Pool' section is highlighted with a red rounded rectangle. It contains two radio button options: 'Include all groups from the quiz' (selected) and 'Select random groups: All out of 1'. There is also an unchecked checkbox for 'Shuffle questions from the selected groups'.
