Managing Presentations

iSpring Converter Pro includes the Presentation section containing tools to manage the structure and media content of your presentation. There are four tools for presentation management:

- Presentation Explorer to organize presentation structure, set up slide advance options and add presenters.
- Resources to manage references, attachments and web links in the presentation.
- Presenters to add presenters info, company logo and links to company website.
- Exporting Presentations to copy the PowerPoint presentation with all its resources to a specific folder.
