

Locking the Player Controls

You can restrict user navigation by disabling the player navigation controls. If you lock them, navigation will be disabled in the following areas:

- Outline
- Thumbnails
- Timeline
- Previous/Next
- Replay

The screenshot shows the 'Presentation Explorer' window with a table of slides. The table has columns for #, Title, Advance, Branching, Lock, Presenter, Layout, and Playlist. Slide 3, titled 'Getting Started', is selected and highlighted in blue. A red box highlights the 'Lock' button in the top toolbar, with a callout text: 'Click to lock/unlock navigation controls of the selected slides'. Another red box highlights the 'Lock' icon in the 'Lock' column for slide 3, with a callout text: 'Click to lock/unlock navigation controls of a slide'.

#	Title	Advance	Branching	Lock	Presenter	Layout	Playlist
1	iSpring Converter Pro	4,0s	Default				None
2	iSpring Converter Pro	11,5s	Default		Monique ...	Full	None
3	Getting Started	10,0s	Default	🔒	Monique ...	No Sidebar	Background music
4	Create Your Course in PowerPo				Monique ...	Full	Background music
5	Set Up Presentation Structure	13,0s	Default		None	No Change	None

In player, when your mouse pointer is over the Outline or navigation buttons, you will see the lock icon on them. Users won't be able to move to the locked slide.

Note: Even if navigation is locked, users can navigate to another slide on click or automatically. Disable [Automatic](#) or [On-Click navigation](#), if you want to completely restrict user navigation.
