Hiding Unused Tracks and Panes

On the **View** tab of the Narration Editor toolbar you can configure what elements of the interface to display.

Option	Description
Slide Thumbnails	Select this checkbox to display the side bar with slide thumbnails.
Slide Notes	Select this checkbox to display the Notes pane with slide notes.
Audio Track	Select this checkbox to display the audio track on the timeline. If you do not want to insert an audio narration to your presentation, it makes sense to hide the audio track to maximize the screen estate.
