Activation process should be complete within 3 days after you entered the license key. If the license is not activated within this period, an evaluation watermark will be added to your presentations.

The license activation binds the product to a given computer and its operating system. As the number of the allowed activations is limited, you should [deactivate a previously activated license](#) in case you want to reinstall the operating system or activate the license on another computer. This way you will not lose your activations.
