

Publishing to YouTube

With the **Publish to YouTube** option, you can put your video lectures on YouTube right from the iSpring publishing window. No need to save a video to your computer: just sign in to your account right there and click Publish.

The image shows the 'Publish Presentation' window in iSpring Presenter. The window has a title bar 'Publish Presentation' and a close button. The main area is divided into a left sidebar and a main content area. The sidebar contains icons and labels for 'WEB', 'CD', 'iSpring Cloud', 'iSpring Learn', 'LMS', and 'Video'. The 'Video' option is selected. The main content area has two tabs: 'General' and 'Compression'. The 'General' tab is active. It contains the following fields: 'Destination' (a dropdown menu with 'YouTube' selected and highlighted by a red box), 'Account' (a button labeled 'Sign In'), 'Video profile' (a dropdown menu with 'Custom' selected and a 'Configure...' button), 'Video Information' section with 'Title' (text field with 'Olympic Games Demo'), 'Description' (text area), 'Category' (dropdown menu with 'Sign in to select category'), and 'Permission' (dropdown menu with 'Public (anyone can search and view)'). At the bottom of the 'General' tab are 'Slide Range' options (radio buttons for 'All slides' and 'Selected slides (1 slide)') and 'Playback Options' (a section with 'Seconds to spend on each slide' set to '5,0'). At the bottom of the window are buttons for 'Import/Export', 'Publish', and 'Cancel'.

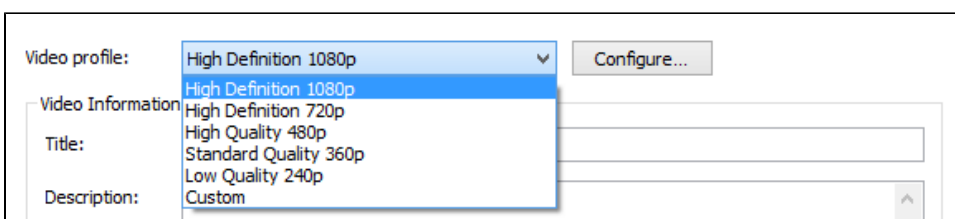

See the step-by-step instructions for uploading a video presentation to YouTube below:

1. Choose **YouTube** in the Destination field
2. Click **Sign In** in the Account field. You will see a window where you can enter your YouTube account details.

A screenshot of a 'Connect to YouTube' dialog box. The title bar says 'Connect to YouTube' with a close button. The main content area features the Google logo, the text 'Sign in with your Google Account', a placeholder profile picture, an input field labeled 'Enter your email', a blue 'Next' button, and a 'Need help?' link. Below this, it says 'One Google Account for everything Google' with icons for various Google services. At the bottom are links for 'Google', 'Privacy', and 'Terms'.

If you don't have a YouTube account, sign up for YouTube and create your personal channel. Please read the article [Create an account on YouTube](#) for more details.

3. Click **Sign In**. When you enter your account details, iSpring validates this data, and you will see your YouTube account info in the **Account** field.
4. Select a **video profile** depending on the device type

A screenshot of a video configuration interface. A dropdown menu for 'Video profile:' is open, showing options: 'High Definition 1080p', 'High Definition 720p', 'High Quality 480p', 'Standard Quality 360p', 'Low Quality 240p', and 'Custom'. The 'High Definition 1080p' option is selected. To the right is a 'Configure...' button. Below the dropdown are input fields for 'Title:' and 'Description:'. The 'Video Information' label is to the left of these fields.

5. Change **Video Information**: title, description, category
6. Choose viewing **permissions** for a video file: public, private, and unlisted

7. Specify the time to spend on a slide in the **Playback Options**

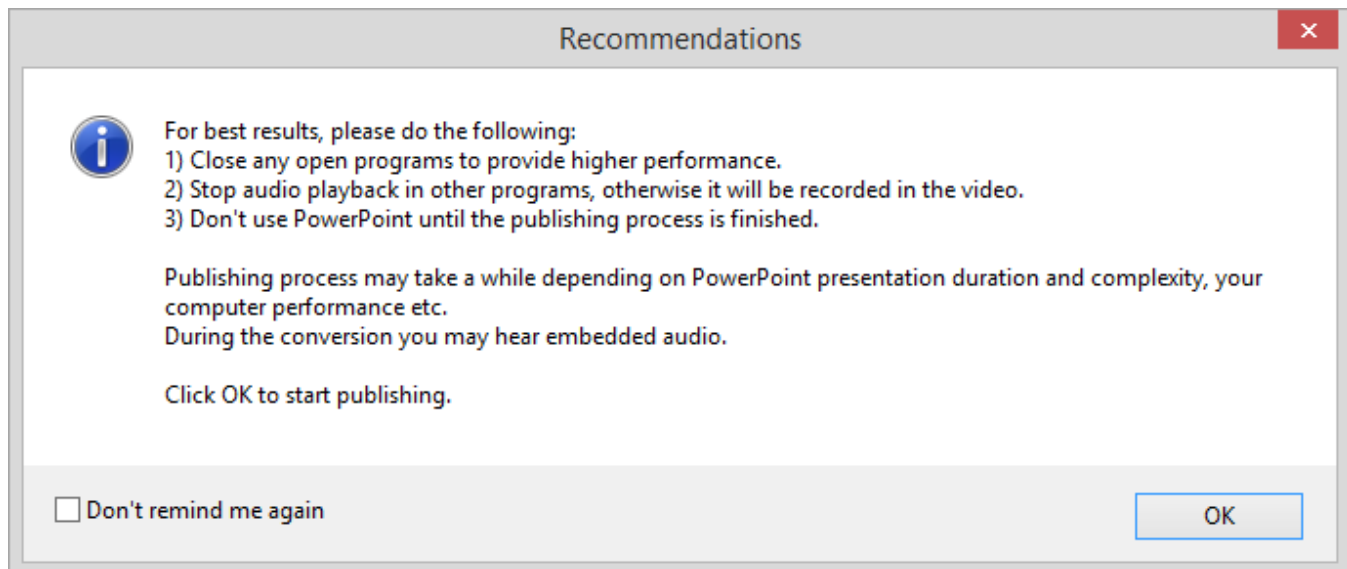

If you selected individual slide timings and set the automatic playback of the animation effects for your PowerPoint presentation, these settings will be preserved in the resulting video file. You can select different timing properties for each particular slide in PowerPoint. It's recommended to use the following settings if your presentation contains animations and transitional effects:

- a. Change the start option for each animation effect on the Animations tab: choose 'Start With Previous' and 'Start After Previous'
- b. Set the Duration and Delay options of each effect (if necessary)
- c. Select the 'On Mouse Click' check box on the Transitions tab to advance the slide when you click the mouse

8. Click **Publish** to convert your presentation to a video file and upload it to YouTube.

Pay attention to the recommendations list that you'll see in the pop up window after you click Publish.

Once publishing is finished, the video processing window will automatically pop up. Next, you can go to your video channel, and manage your video in the Video Manager of your YouTube account.
