

Hiding Slides

You can mark any slide as hidden by clicking the **Hide Slide** button on the toolbar or double clicking its thumbnail.

Hidden slides are not displayed in the outline of the player. They are skipped during presentation playback. Please note that hidden slides still exist in your presentation and can be accessed using hyperlinks or action buttons on the other slides.

The screenshot shows the 'Presentation Explorer' window with a toolbar at the top and a table of slides below. The toolbar includes buttons for 'Save & Close', 'Hide Slide', 'Promote Demote', 'On-Click Auto', 'Branching', 'Lock', 'Presenter', 'Layout', and 'Playlist'. The 'Hide Slide' button is highlighted with a red box and a callout that says 'Click "Hide Slide" to show or hide the selected slides.' The table lists slides with columns for '#', 'Title', 'Advance', 'Branching', 'Lock', 'Presenter', 'Layout', 'Playlist', and 'Object'. Slide 5 is highlighted in blue and has a 'hidden' label next to its title 'Set Up Presentation Structure'. A callout points to its thumbnail, saying 'Double-click the slide thumbnail to hide or show a slide.' The status bar at the bottom shows 'Slides: 12' and 'Duration: 2m 37s'.

#	Title	Advance	Branching	Lock	Presenter	Layout	Playlist	Object
3		10,0s	Default		Monique ...	No Change	None	+ Add
4	Create Your Course in PowerPoint	20,0s	Default		None	Full	None	+ Add
