Configuring the Universal Player

The Universal player is a highly customizable HTML5 and Flash player with the advanced features.

You can configure the player prior to publishing your presentation.

To customize the Universal player:

1. Choose **Universal** from the Player drop-down menu in the General tab.
2. Click the **Customize** button.

The Universal player allows you to customize:

- Templates
- Layout
- Top bar
- Bottom bar
- Outline
- Colors
- Text Labels
