

Controlling Player Layout

iSpring Suite allows you to set a layout for each slide individually. When you specify a layout for a slide, you can choose one of four values:

- No change
- Full
- No sidebar

To specify a player layout for a given slide:

1. Select a slide in the Presentation Explorer.
2. Choose a **layout** from the corresponding drop-down menu on the toolbar
or
Double-click the layout icon of a given slide and choose a layout from the drop-down menu.

Note: If you want to change the player layout for several slides, select them while holding down the **SHIFT** or **CTRL** keys and then choose their layout from the **Layout** drop-down menu on the toolbar.

The screenshot shows the 'Presentation Explorer' window in iSpring Suite. The toolbar at the top includes icons for 'Save & Close', 'Hide Slide', 'Promote/Demote', 'On-Click/Auto', 'Branching', 'Lock', 'Presenter', and 'Layout'. The 'Layout' dropdown menu is open, showing options: 'No Change', 'Full' (selected), and 'No Sidebar'. A red callout box points to the 'Full' option with the text 'Choose a player layout for the selected slides'. The main table lists five slides with their titles, durations, branching, lock status, presenter, and layout. A second red callout box points to the layout icon for slide 3 with the text 'Double-click and choose a player layout for a slide'.

#	Title	Advance	Branching	Lock	Presenter	Layout	Playlist	Object
1	iSpring Converter Pro	4,0s	Default		None	No Change		+ Add
2	iSpring Converter Pro	11,5s	Default		Monique ...	Full		+ Add
3	Getting Started	10,0s	Default			Sidebar		+ Add
4	Create Your Course in PowerPoint	20,0s	Default		Monique ...	Full		+ Add
5	Set Up Presentation Structure	13,0s	Default		None	No Change		None
