

# Getting a List of Courses

AVAILABLE WITH BUSINESS SUBSCRIPTION

## Method: `getContent`

1. You will retrieve a list of course that were originally uploaded to the account. Content copied from other courses won't appear in the response.
2. The response contains only the original created or downloaded versions of courses and content.

Let's suppose that when creating Course B, you copied a quiz as a [linked copy](#) from Course A. Only the original quiz from Course A will be included in the response.

Note that the way you create the copy of the content is important:

- If it is a copy, then the data about the content will be shown in the response.
- If it is a linked copy, the information will not be shown.

3. Learn how to get a list of all course modules in the [Getting a List of Course Modules](#) article.

## Permissions to Run the Request

*Account Owner, Account Administrators, Department Administrators*, as well as *Course Authors* and *users with a custom role* with [access](#) to the project containing this course.

For users with a custom role, allow "View and enroll users into training programs."

### Learning Management

- ☒ View and enroll users into training programs
- ☐ Grade assignments

### Knowledge Base

- ☐ View content in the "Knowledge Base"
- ☐ Download and edit content in the "Knowledge Base"
- ☐ Remove content from the "Knowledge Base"

## Request Parameters

Parameter	Type	Description
token (required)	string	Access token. You can obtain a token <a href="#">by making a request</a> .

## Return Value

After the request has been successfully processed, the system returns an object with the following properties:

Parameter	Type	Description
contentItem	array	An array containing a list of all account courses and information regarding them
contentItemId	string	ID of the learning track, course, or content
title	string	Title of the learning track, course, or content

subtitle	string	Subtitle of the learning track, course, or content
description	string	Description of the learning track, course, or content
userId	string	ID of the user to whom the learning track, course, or content is assigned
addedDate	dateTime	Date of addition of the learning track, course, or content
viewUrl	string	Link to view the learning track, course, or content
type	string	<a href="#">Type</a> of content

## Sample Request

```
<?xml version="1.0" encoding="utf-8"?>
<SOAP-ENV:Envelope xmlns:SOAP-ENV="https://schemas.xmlsoap.org/soap/envelope/"
  xmlns="https://ispringlearn.com/go/services/api/soap">
  <SOAP-ENV:Body>
    <GetContentRequest>
      <credentials>
        <token>p-1sJDjmULL5DdpXPJTcbm4jVIaWVHvNmrjAxATRbNE</token>
      </credentials>
    </GetContentRequest>
  </SOAP-ENV:Body>
</SOAP-ENV:Envelope>
```

## Sample Response

```
<SOAP-ENV:Envelope xmlns:SOAP-ENV="https://schemas.xmlsoap.org/soap/envelope/" xmlns:ns1="https://ispringlearn.
com/go/services/api/soap">
  <SOAP-ENV:Body>
    <GetContentResult>
      <contentItem>
