Getting a List of Course Modules (Deprecated)

AVAILABLE WITH BUSINESS SUBSCRIPTION

Method: **listCoursesModules**

Notes:

1. Now courses in iSpring Learn can not only contain materials, but trainings as well. To receive a list of all the materials and trainings of a course, use the Getting a List of Course Materials and Trainings method.
2. The **Getting a List of Course Modules** method should no longer be used at all, as the response will only contain course materials, without trainings. This method might cease to exist in the future.
3. With the **Getting a List of Course Modules** method, you can get a list of the materials of all the account's courses or select courses from which you would like to retrieve the materials.

Permissions to Run Request

The *Account Owner*, *Account Administrators*, *Department Administrators, Course Authors,* or custom roles.

Department Administrators, *Course Authors*, and users with a custom role can only retrieve info regarding users belonging to the departments they manage and their sub-departments.

Request Parameters

Parameter	Type	Description
token (required)	string	Access token. You can obtain a token by making a request.
contentItemId (required)	string	The course ID.
pageSize (optional)	string	The number of entries per page. If not indicated, equal to 1000.
pageToken (optional)	string	The token needed to continue to the next page.

Return Values

After the request is successfully processed, the system returns an object with the following properties:

Parameter	Type	Description
modules	array	An array containing a list of all materials of all account courses or of certain courses.
module	array	An array containing information about the material.
moduleId	string	The material ID.
contentItemId	string	The material ID.
courseId	string	The ID of the course to which the material belongs.
title	string	The name of the material.
description	string	The description of the material.
authorId	string	The ID of the material's author
addedDate	dateTime	The creation date of the material.

viewUrl	string	The link to view the material.
nextPageToken	string	The key needed to continue to the next page.

Possible Errors

Error	Description
Unknown content item	The course with the indicated ID was not found.
Permission denied	The user doesn't have permission to complete the request.
