

Leaderboards

Leaderboards help you to evaluate students' progress. You can check the effectiveness of the training process for a certain group or a specific department. For example, checking the results of newcomers will allow you to choose the best candidate for a certain position.

To view the user leaderboard:

1. Open the **Reports** section and select the [Leaderboard](#) report.

2. Choose a department or a group and click **Run Report**. If you need, select **Include nested departments**.
