

Publishing a Quiz for iSpring Play

iSpring QuizMaker offers an easy way to make your quiz more effective. With [iSpring Play](#), you can access your quizzes on a wide range of devices, including iPads and Android tablets, even offline. Compatibility requirements: iOS 6.0+, Android 4.0+.

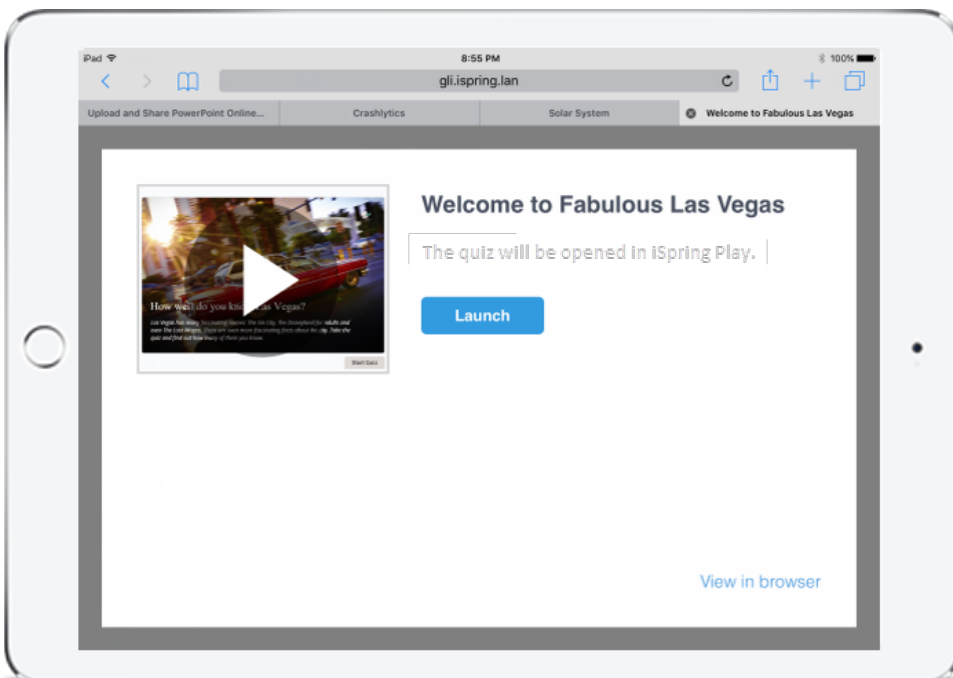

iSpring Play v2.0 is yet another awesome addition to the powerful set of upgrades supercharged into iSpring QuizMaker 8. When you publish content, you can offer your users the option to open their courses right on their iPhones in a new and improved interface!

To view a quiz on a tablet or smartphone, mark the following options when publishing for web:

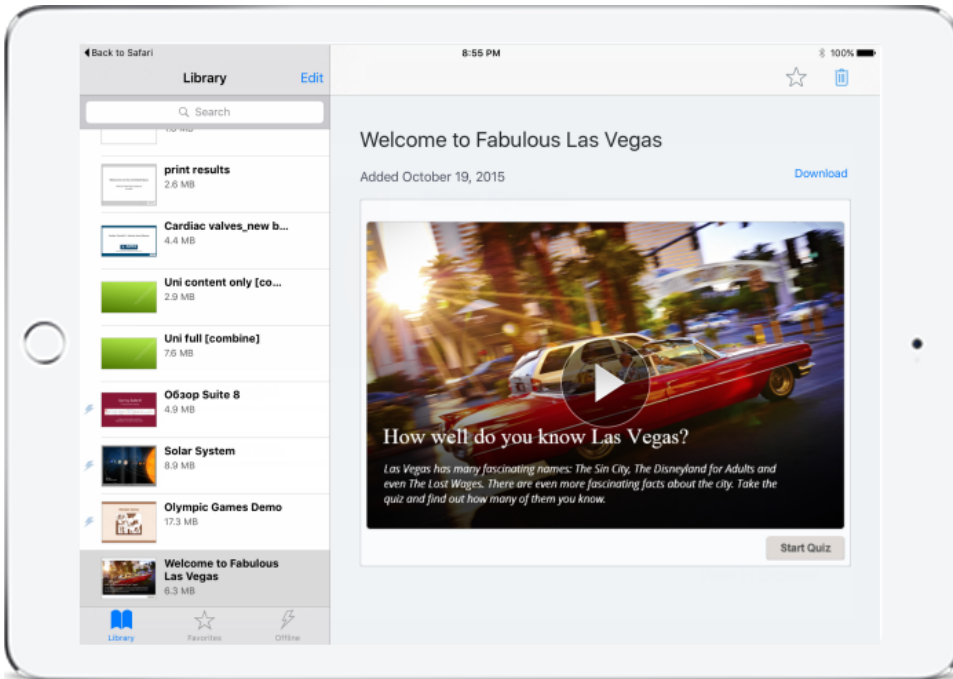

1. Select the **Use iSpring Play** checkbox.

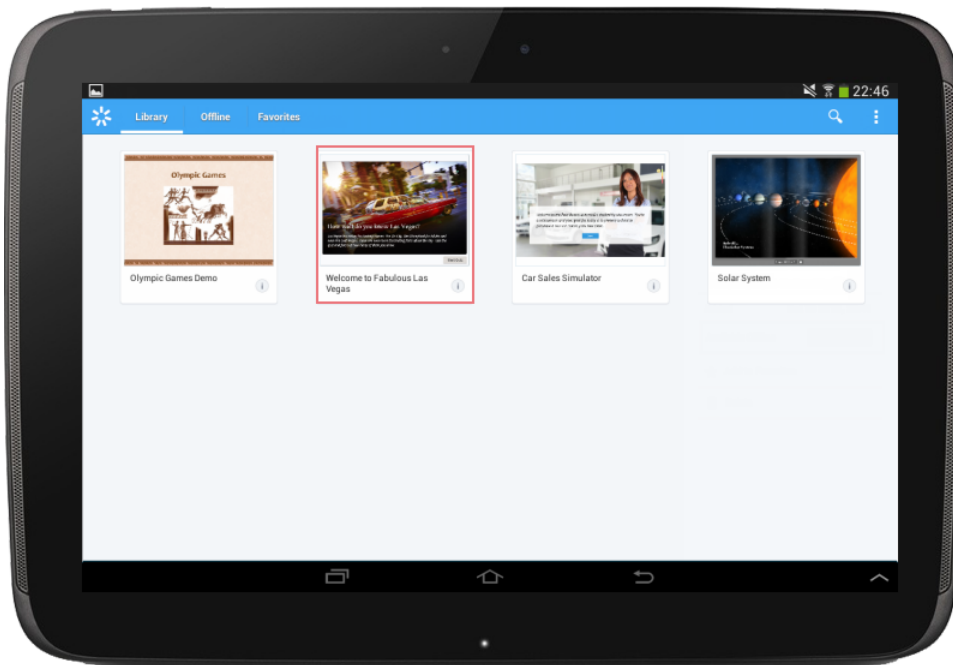

2. Upload your published quiz to any web site and share the link to the quiz with your users.
 3. Open the quiz link in the browser on your tablet. You will see the screen with the **Launch** button. Tap **Launch** to view your quiz in the iSpring Play app.
- If the iSpring Play application is not installed on your device, you'll be asked to download it from the [Apple App Store](#) or [Google Play](#).

4. In the iSpring Play application, select a quiz in the list and tap the **Play** button.

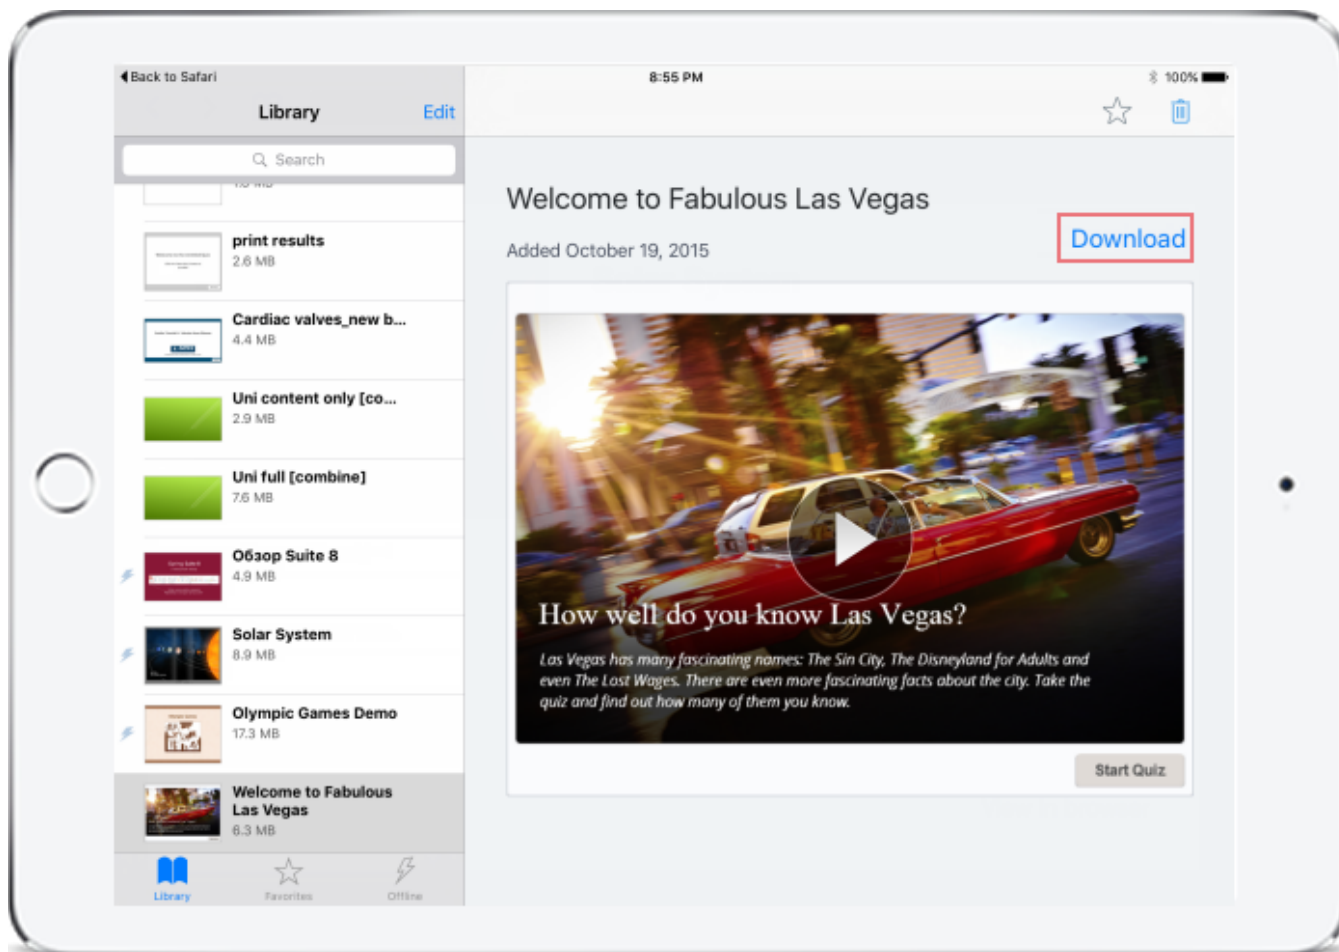

5. If you view a quiz on your Android device, tap the quiz thumbnail in the **Library** list to view it.

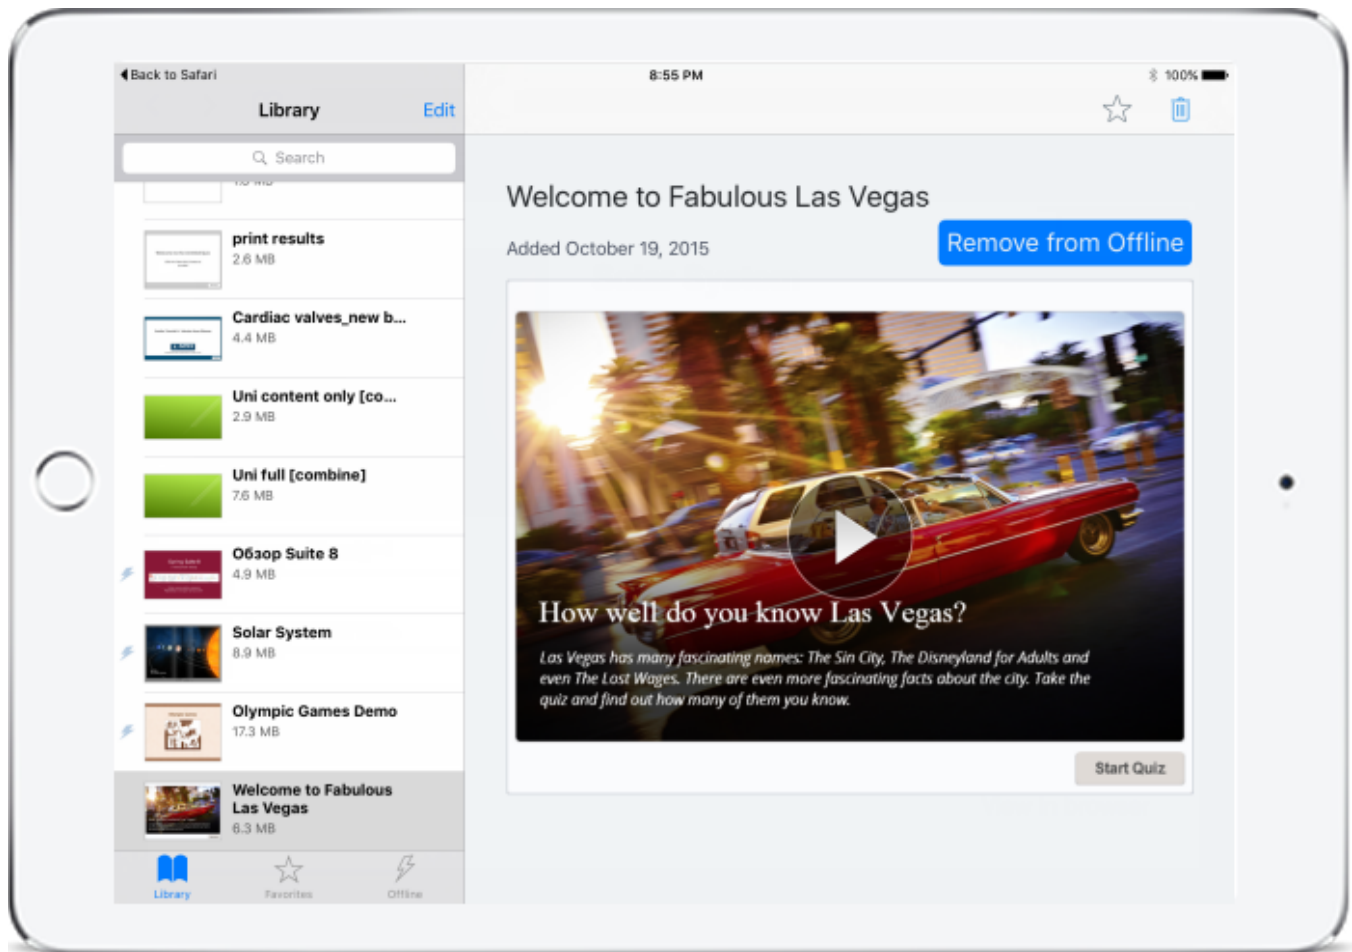

Save quizzes for offline viewing

You can access your quizzes even when you are offline.

To download a quiz for offline viewing on your iPad, just click the **Download** button above the quiz thumbnail.

If you click **Remove from Offline**, the offline copy will be removed from your device.

For Android devices, click the 'i' icon on the quiz thumbnail and switch on the '**Available Offline**' slider. If you change the slider back to **Off**, the offline copy will be removed from your device.
