iSpring Learn (Old Version)

Welcome to iSpring Learn Guide!

iSpring Learn is an easy-to-use hosted Learning Management System (LMS). It allows you to deploy distance learning at a company or university in a matter of hours. With numerous reports available in iSpring Learn LMS, you can get the accurate and reliable data to evaluate the effectiveness of your training program.

iSpring LMS is tightly integrated with iSpring authoring tools. You can publish your e-Learning materials to iSpring LMS in one click directly from any iSpring authoring tool. Enter your iSpring Learn credentials and click the Publish button. Your content gets uploaded to iSpring Learn.

As an open system, iSpring LMS doesn't put any limitations on your authoring tool choice. Along with the iSpring-made courses, presentations, and quizzes, you can publish the following content types to iSpring LMS:

- SCORM 1.2 and 2004 (all editions)
- Video (.FLV and .MP4)
- Audio (.MP3)
- Reference documents (.DOC, .XLS, .PDF)
- Presentations (.PPT)
- Flash movies (.SWF)

Also, you can add such content types as learning paths, assignments, and web links to external resources.

You can access the LMS content from any device browser including mobile devices.
