Updating iSpring Cam

When a new iSpring Cam version is released, you will see a notification on the toolbar. The red number indicates how many updates have been released since the last time you updated. To get started, click the **Update** button on the toolbar and follow the steps of the update wizard.

1. In the new window, you will see your currently installed version, the latest version, and a list of improvements and fixes in the update. Click **Install.**

9	Checking for Upda	ates		
A new version of iSpring Cam is available Installed version: 8.3.1.15882 Available version: 8.3.1.16018				
Version 8.3.1.1 released: August 2		Install		
 Fixed issue with capturing selected areas on High-DPI displays
