

Recording Video

You can record a video narration using a standard web cam and iSpring Suite. To start recording, click **Record Video** in the Narration area in your iSpring toolbar, and the Record Video Narration video window will open.

To record a video:

1. Choose the slide where you want to record video from the drop-down slide list.
2. Click **Start Record** to start the video recording. If the button is not active, check the connection to your webcam.
3. Click **OK** to save the video or **Cancel** to exit without saving the changes.
