# Narration Editor

The Narration Editor is a tool for synchronizing slides with sound and video. With the help of the editor, you can import existing audio files, record sound from a microphone, import video files, and record video from a webcam.

To open the Narration Editor:

1. Click the **Manage Narration** button on the toolbar.

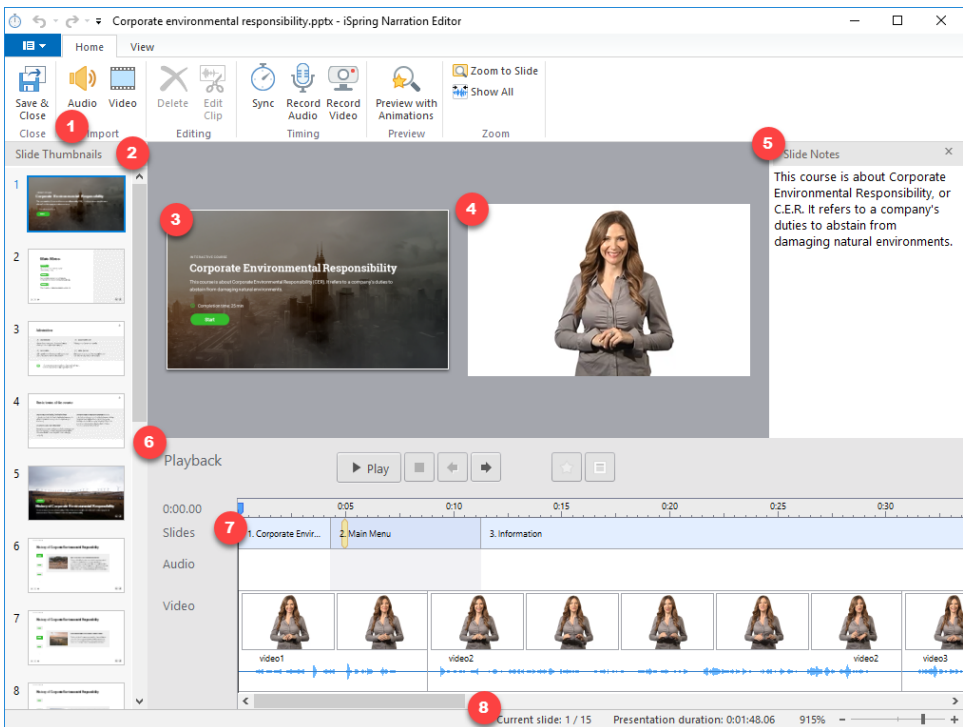

2. The Narration Editor will open in a new window.

Table 1. Narration Editor

Area	Description
1	The toolbar gives you access to most of the functions of the Narration Editor.
2	This pane shows the list of slides in your presentation.
3	This is where the current slide is shown.
4	This pane will display the current video frame or play the video when you preview your presentation.
5	This pane shows the presentation notes. If you edit your notes here, they will be updated in your presentation after you click **Save and Close**.
6	This pane contains buttons to control presentation playback.
7	This is the timeline, which is the main function of the narration editor, where you can sync video and audio clips with your slides.
8	The status bar contains info on the total number of slides, presentation duration and zoom slider.
