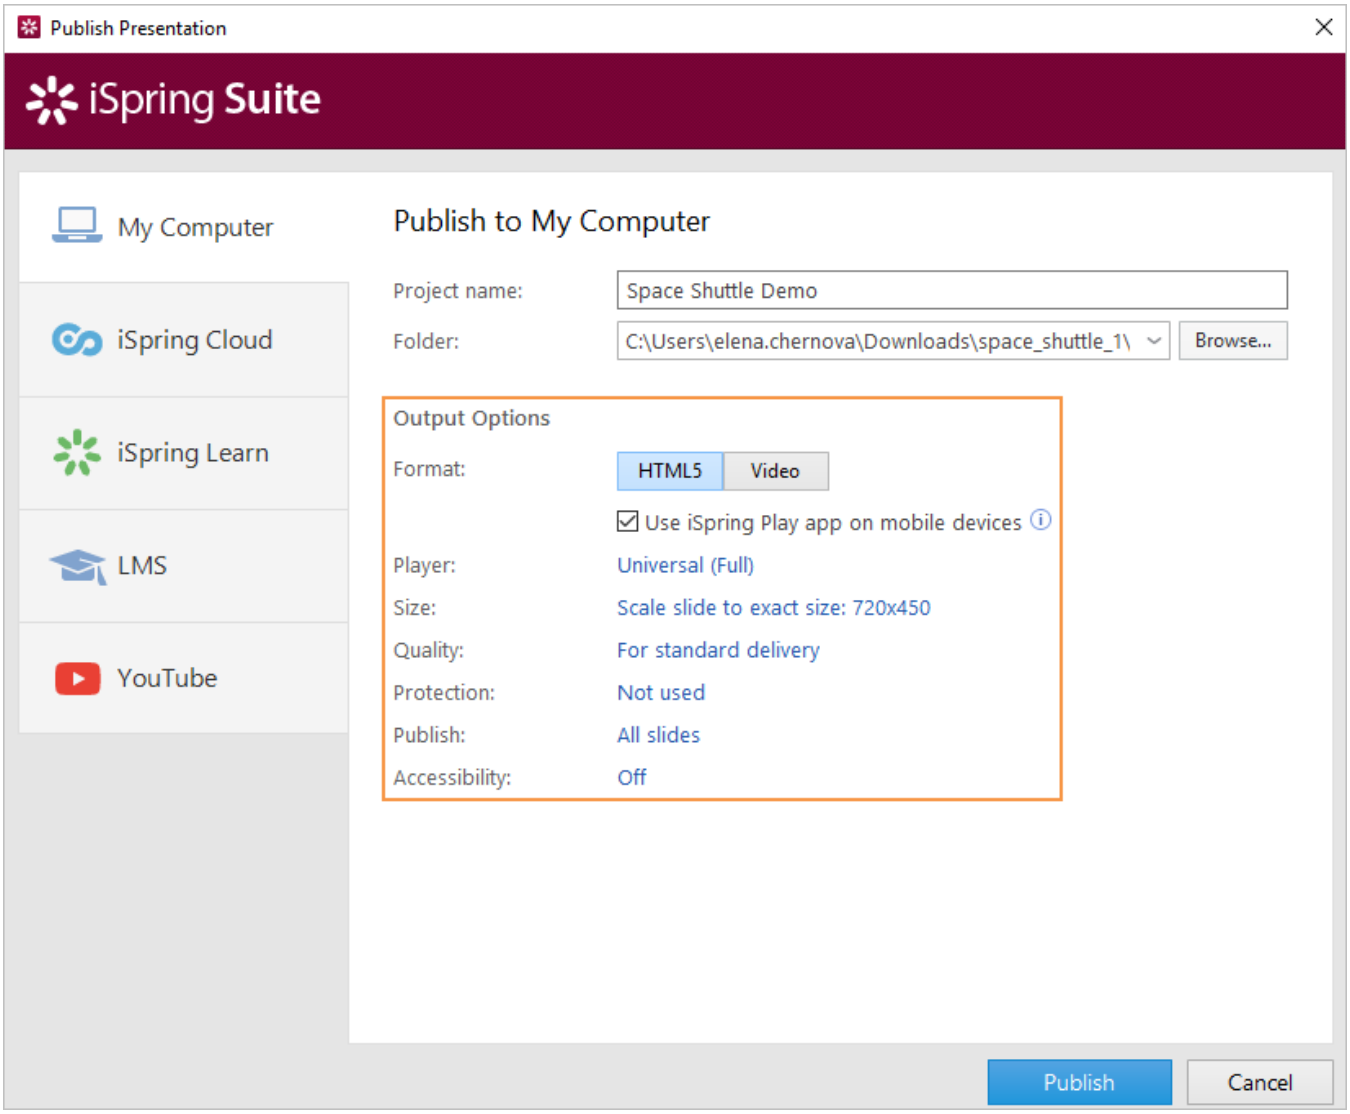
Publishing Options

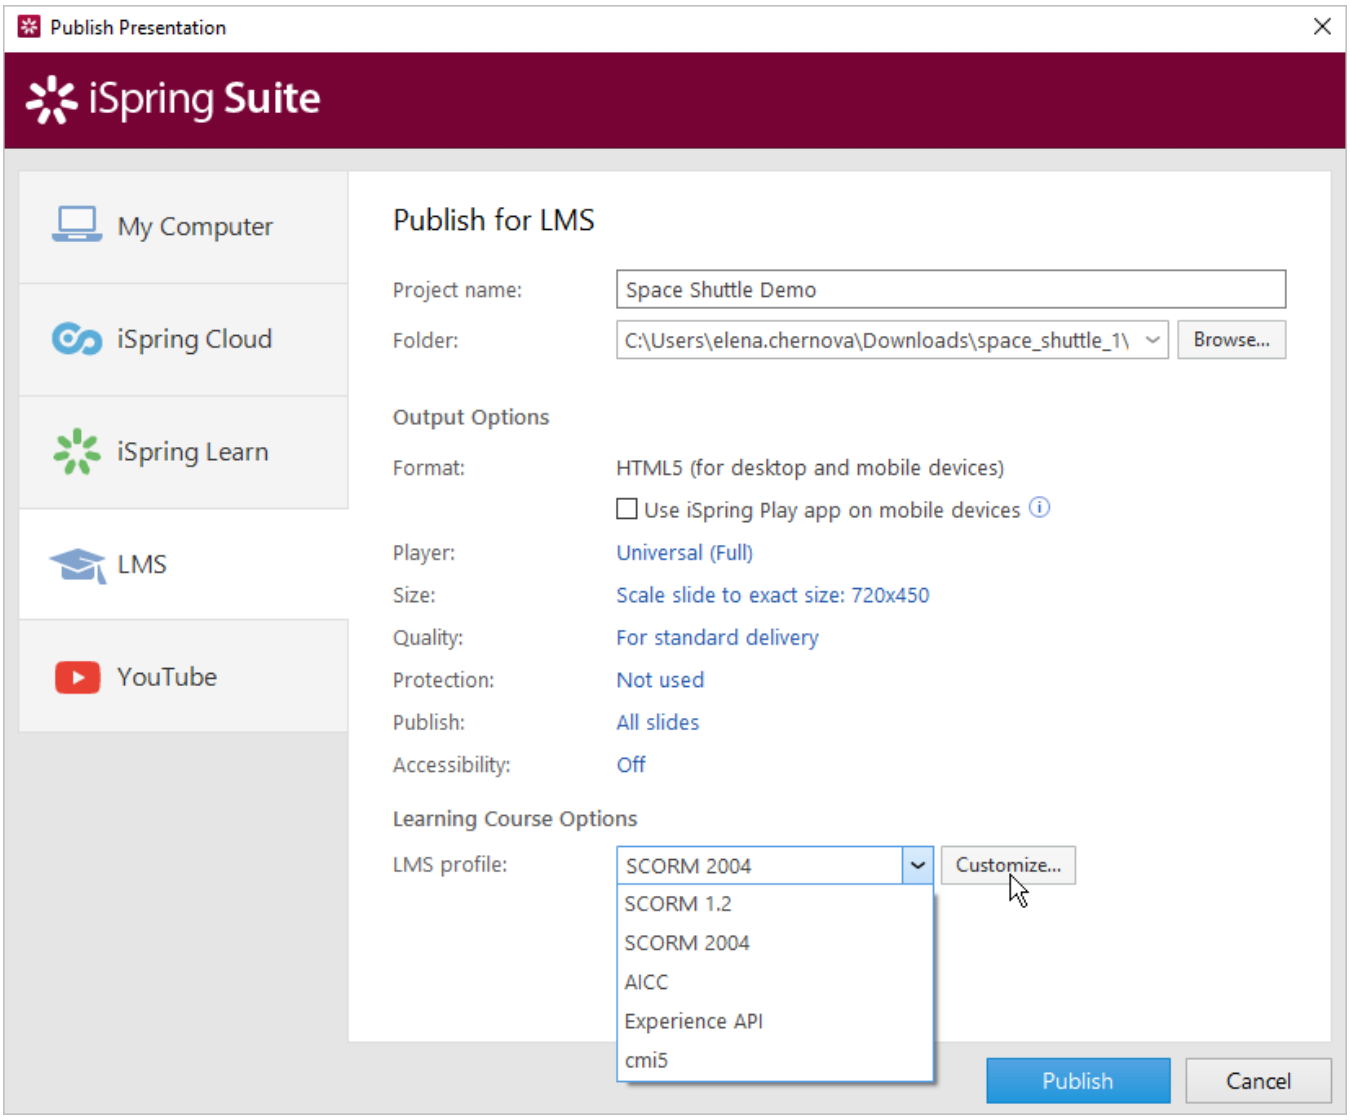
When publishing courses, you can set up output options which define the look and feel of your material, its protection level, and the way it is shown on mobile devices.

The most important settings you may want to configure for your presentation are as follows:

- Format
- iSpring Play app compatibility
- Size
- Quality
- Protection
- Accessibility



In case you are publishing a course for LMS, you will be able to choose an LMS profile and customize it. Learn how to do that in the Learning Course Settings article.



Publish Presentation
iSpring Suite
My Computer
iSpring Cloud
iSpring Learn
