

# Quiz Quality

Configure the quality level for images, sound, and videos inserted in the quiz. The higher the quality of the media, the larger the size of the published quiz will be.

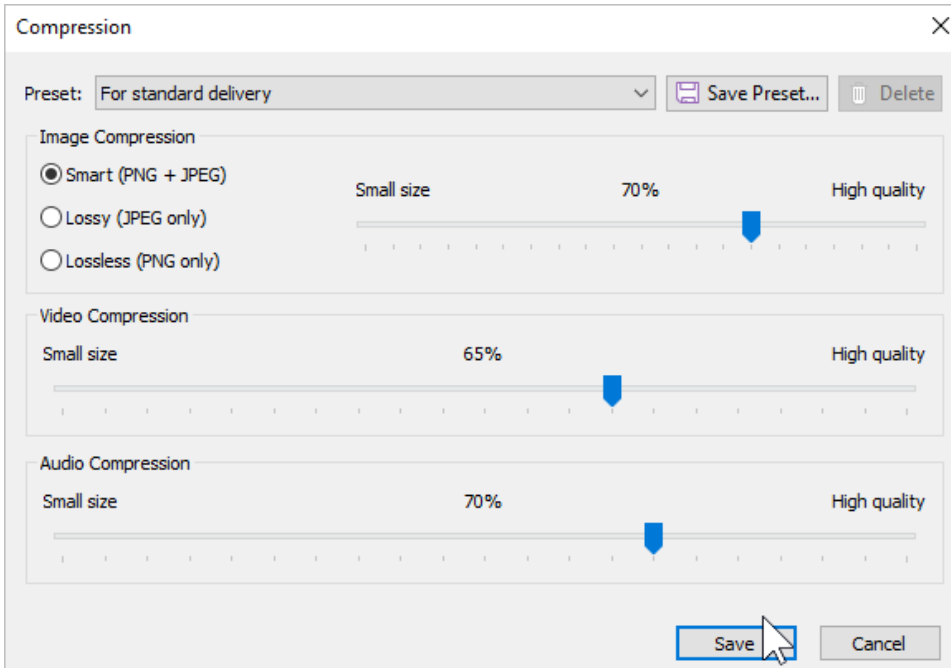

1. Click on the link in the **Quality** field.

2. In the quality settings, you can select one of the ready-made presets or apply custom settings:
  - For high-quality representation
  - For standard delivery
  - For low-speed connections
  - Custom settings

3. Finally, click **Save**.

## Custom Settings

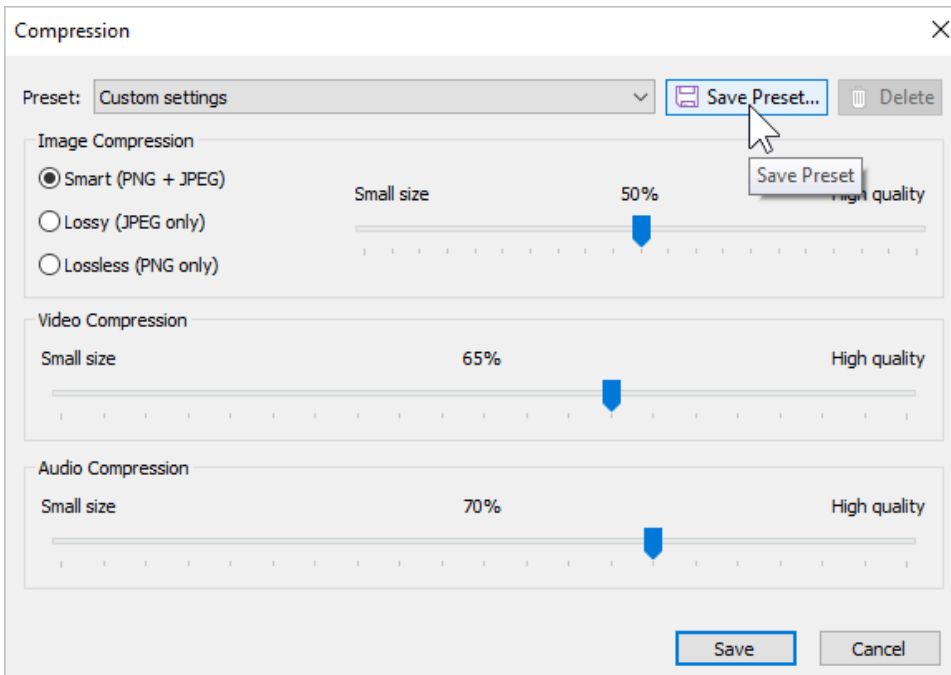

Configure your own quality settings and save them as a separate preset.

1. When creating a custom preset, you can edit three parameters:

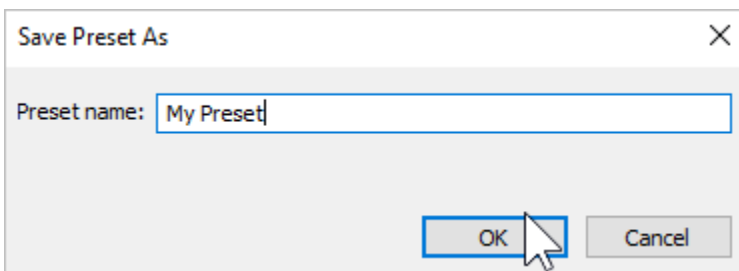

- Image Compression
- Video Compression
- Audio Compression

<b>Image Compression</b>	<b>Smart</b> compression automatically chooses which type of compression to apply to a particular image in the quiz: lossy or lossless. The result is the most optimal in terms of quality and size.
	<b>Lossy</b> compression will save all images from the quiz to JPG format with the specified compression settings.
	<b>Lossless</b> saves images to PNG format. This will ensure the best quality, but the output files will be larger.
<b>Audio Compression</b>	<p>You can set the sound quality in your published quiz from 0% (low quality and small size) to 100% (high quality and size). The recommended quality is 50% or higher. Note that the higher the audio quality, the larger the final file size.</p> <p><b>Note:</b> Audio compression settings affect the audio quality of video files as well.</p>
<b>Video Compression</b>	<p>You can set the video quality in your published quiz from 0% (low quality and small size) to 100% (high quality and size). The recommended quality is 50% or higher. Note that the higher the video quality, the larger the file size will be.</p>

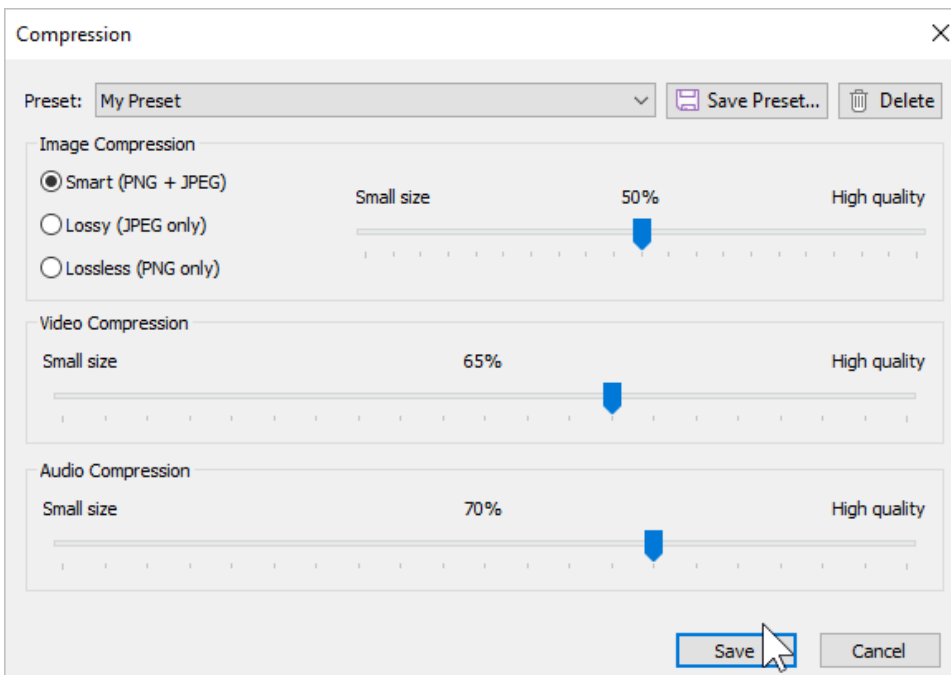

2. Click **Save Preset** at the right of the **Preset** field.

3. Enter the new preset's name and click **OK**.

4. Finally, click **Save**.

5. The saved preset will be added to the list of available presets. You will be able to select it when publishing a quiz.
