

# Adjusting Color Scheme

You can make your quiz stand out by customizing the colors of the player. You can use your corporate colors, or, if your quiz is a part of a presentation, choose colors that match your PowerPoint presentation theme.

- [Choosing a Color Scheme](#)
- [Changing a Single Color](#)
- [Saving a Color Scheme](#)
- [Removing a Color Scheme](#)

The screenshot shows the 'Selling Techniques' quiz player interface. The top toolbar includes icons for 'Apply & Close', 'Features', 'Navigation', 'Colors' (highlighted), 'Text Labels', 'Restart', 'Import', 'Export', and 'Reset to Defaults'. The 'Colors' panel on the left lists various objects and their current colors:

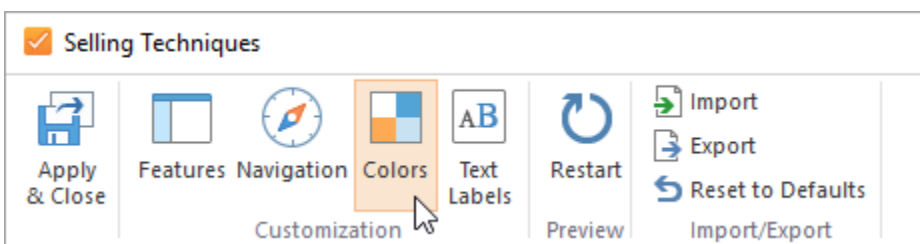

Object	Color
<b>Main</b>	
Page Background	Light Blue
Player Background	Light Blue
Slide Border	Light Blue
<b>Top Bar</b>	
Text/Hyperlink	Black
<b>Player Buttons</b>	
Background	Blue
Text	White
Hover background	Blue
Hover text/icon	White
<b>Dialog Box Buttons</b>	
Background	Blue
Text	White

The main quiz area displays a question about product shelving with a shopping cart icon and a 'SUBMIT' button.

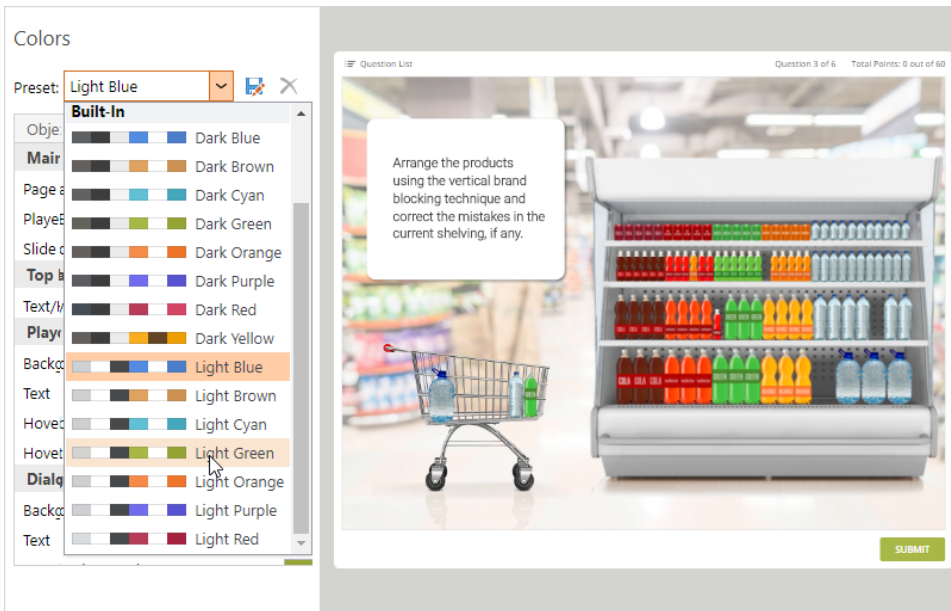

## Choosing a Color Scheme

To change the colors of the player:

1. Click **Colors** on the toolbar.

2. Choose a color scheme from the **Preset** menu.

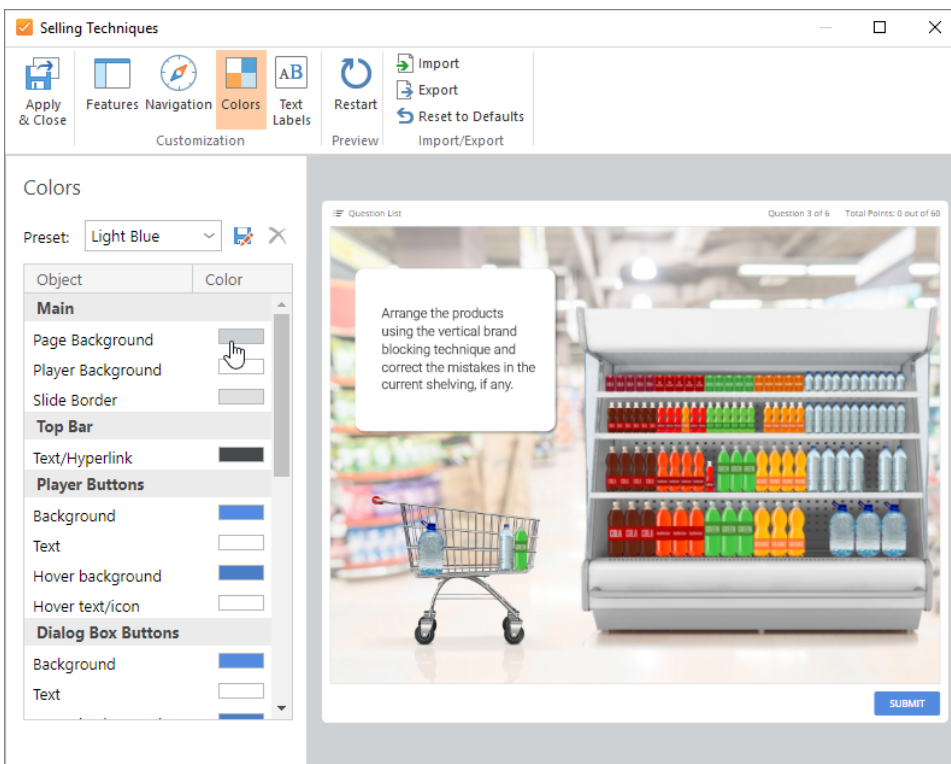

## Changing a Single Color

You can change the color of any element in the player, for example, the background, buttons, and texts.

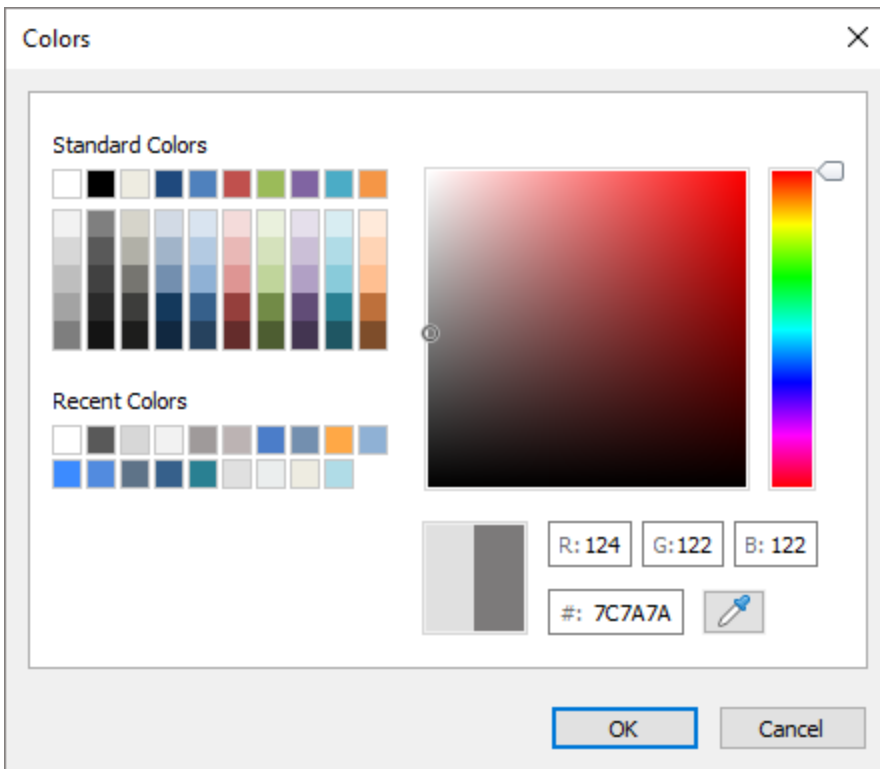

To change the color of any element of the player:

1. Click the color button next to the element whose color you want to change: for example, the page background.

2. In the **Colors** window, select a color using the color picker, enter the color code into the corresponding field, or use the eyedropper tool to choose a color that's visible on your screen.

When you pick a color, the preview pane at the bottom will show both the old and the new colors, so you can see the difference.

3. If you want to revert to the old color, click **Cancel**.

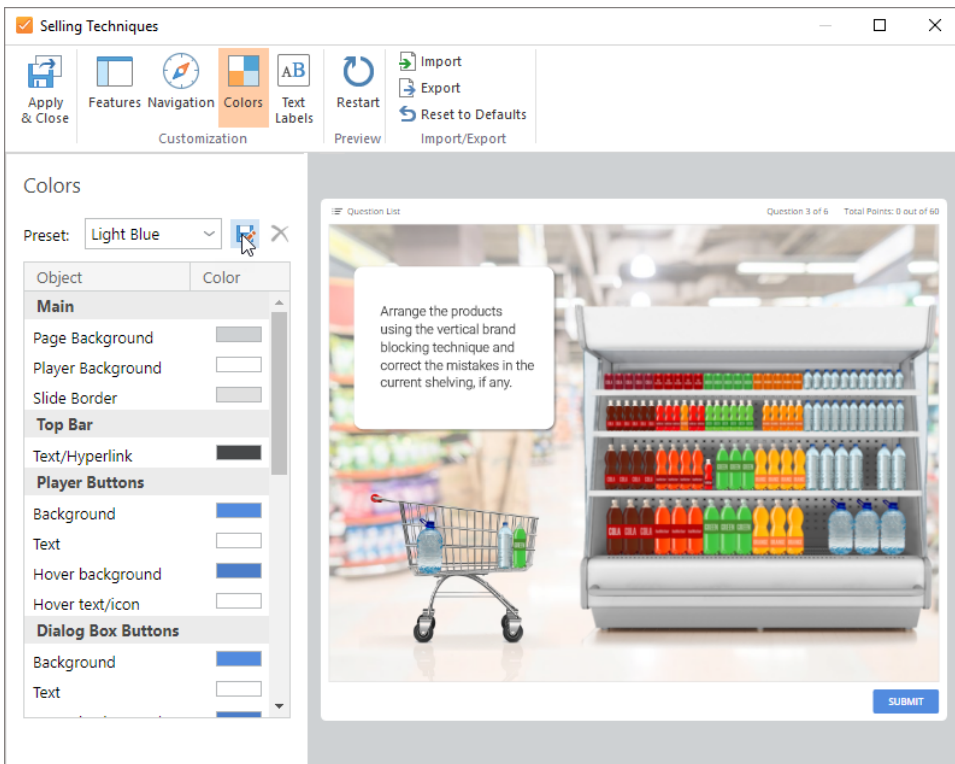

4. Click **OK** to save the changes.

## Saving a Color Scheme

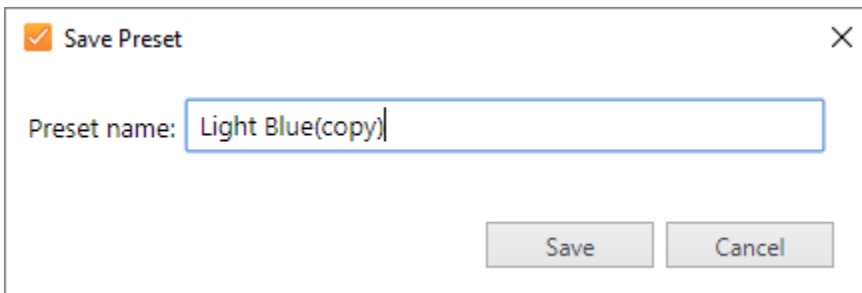

When you're done editing the colors, you can save the current set of colors as a color profile. The same color profile can be used in different quizzes without having to edit all the colors again.

To save a color scheme:

1. Click the  **Save As** button to the right of the preset list.

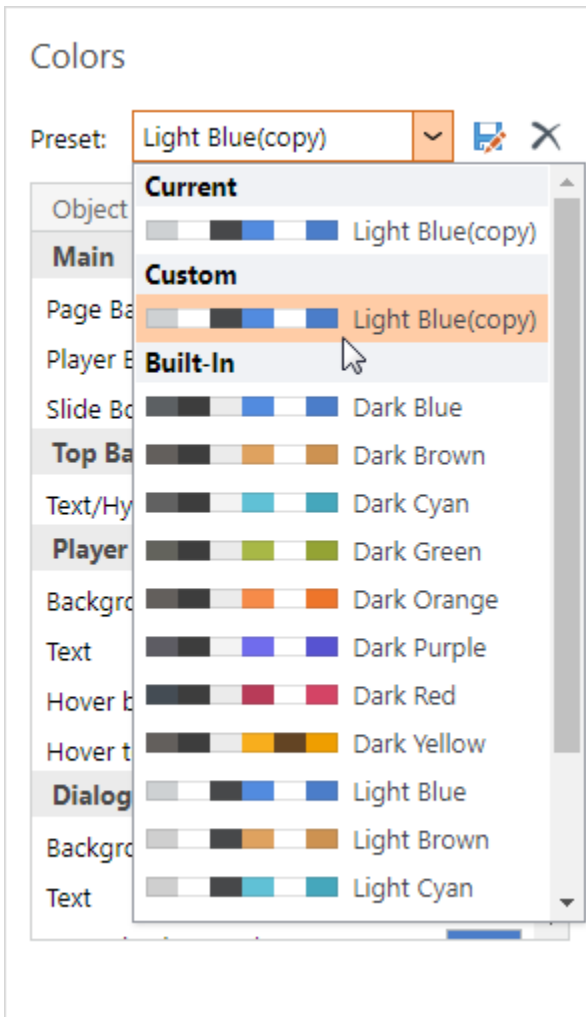

2. Enter the name of the new color scheme.

3. Click the **Save** button.

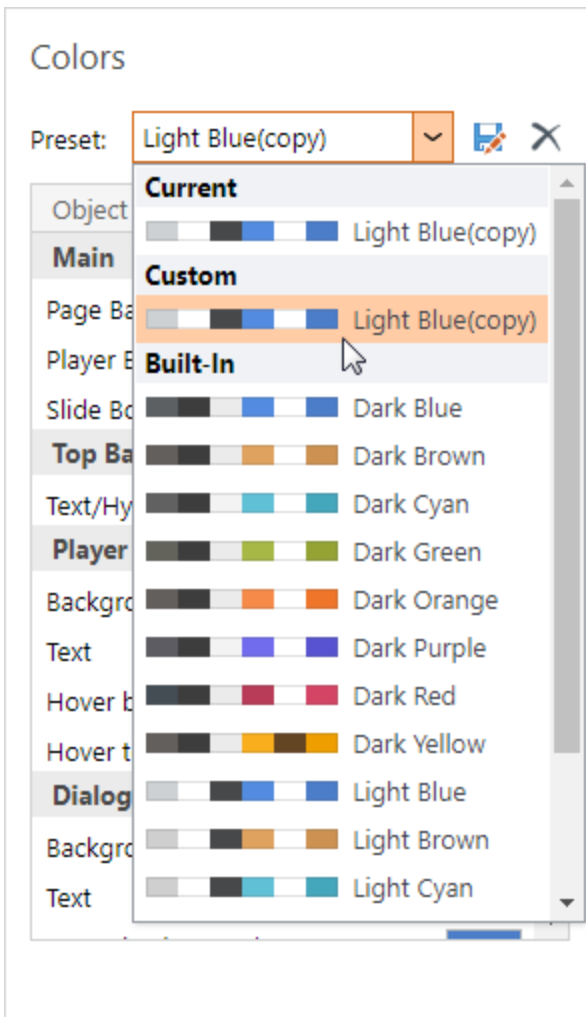

4. Your color scheme will be added to the **Preset** drop-down menu.

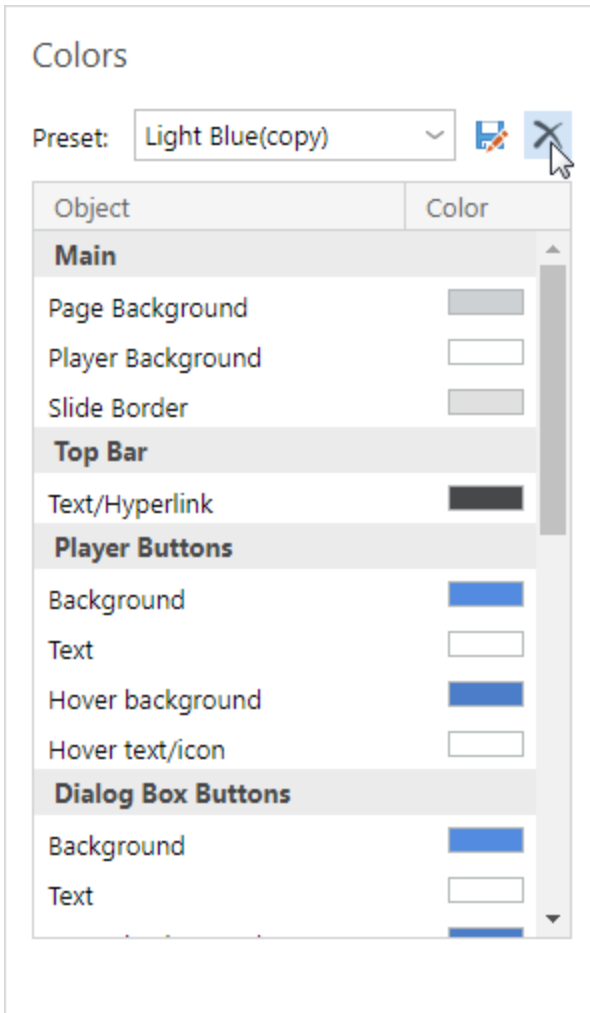

## Removing a Color Scheme

To remove a color scheme:

1. Choose a color scheme in the **Preset** drop-down menu.

2. Click the  Delete button.

3. Click **Yes** to confirm the deletion.

**Note:**

- If you have enabled the **Display slides on smartphones in mobile-friendly mode** in the [Navigation](#) section, changes in the player color scheme won't be applied to the slides displayed on a smartphone.  
If this setting is disabled, any color customizations will be applied to the slides viewed on a smartphone.
