Managing Themes

iSpring QuizMaker comes with a gallery of design themes to choose from. In the **Design** tab of the Slide View mode, you can find a standard theme that you like and apply it to a single question slide or to all slides. It's possible to modify it by changing fonts and background styles.
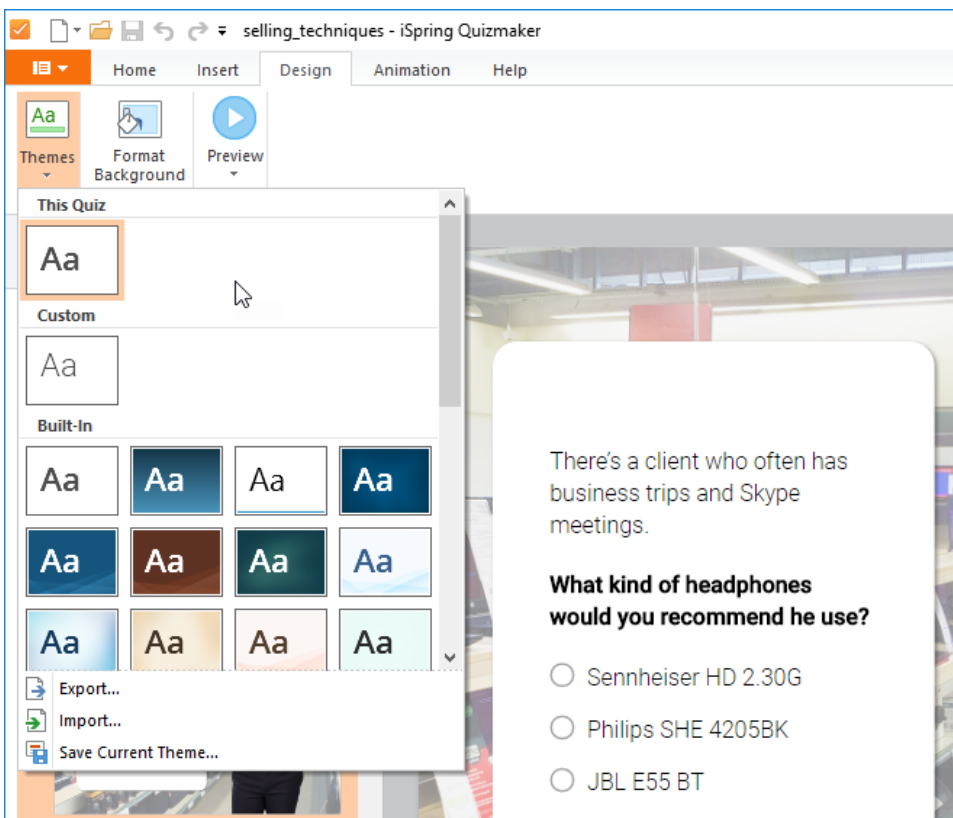

You can save a modified theme as your own custom theme and reuse it in your quizzes or share it with colleagues.

- Apply a Theme
- Create a Custom Theme
- Save a Theme
- Set the Default Theme
- Import and Export Themes
- Delete a Theme

Apply a Theme
To apply a design theme to all slides:

1. Go to Slide View mode and select the **Design** tab.
2. Click the **Themes** button on the toolbar.
3. Select the desired theme from the list.

To apply a theme to a single slide or to several selected slides:

1. On the Design tab, click **Themes**.
2. Right-click the theme that you want to apply to a slide.

3. Select **Apply to Selected Slides** in the menu.

Create a Custom Theme

iSpring QuizMaker comes with 40 preformatted themes that have been designed to alter the appearance of your quizzes. You can easily change the look and feel of the entire quiz or a single question by applying a different theme. You can format such elements as background fill and text style.

- To change the background fill, click Format Background on the toolbar.
- Use the Text Formatting Tools on the ribbon to change the text style, size, colors, etc.

When you are done with the changes, apply your custom theme to all slides if necessary or save it for further use.

Save a Theme

Save the changes that you make to the fonts and background fill effects of an existing theme so that you can apply it to other quizzes.

1. On the Design tab, click **Themes**.
2. Click **Save Current Theme…** in the menu.
3. In the **Save Theme As** box, type an appropriate name for the theme, and then click **Save Theme**.

The new theme will be added to the list of available themes.

Set the Default Theme

When you create your first quiz, all questions have the Default theme applied.

You can change the default theme to a different theme that is included with iSpring QuizMaker or a custom theme. After that, all new quizzes and questions will be created with the new default theme applied.

To change the default theme, do the following:

1. On the Design tab, click **Themes**.
2. Right-click the theme that you want to select as default
3. Choose **Set as Default Theme** in the menu

Import and Export Themes

To export a theme:

1. On the Design tab, click **Themes**.

2. Click **Export…** in the menu.
3. In the **Save As** window, type an appropriate name for the theme, and then click **Save**.

To import a saved theme:

1. On the Design tab, click **Themes**.
2. Click **Import…** in the menu.
   In the **Open** window, locate the theme to import, and then click **Open**.

The selected theme will be added to the list of custom themes.

Delete a Theme

To delete a custom theme:

1. On the Design tab, click **Themes**.
2. Right-click the theme that you want to delete.
3. Choose **Delete** in the menu.

The theme will be removed from the list of custom themes.

Note: You cannot delete built-in themes.blocked URL
