## **Customizing Color Scheme**

Customize the color of the player elements to make it look in the same stylistic fit with the role-play or corporate colors of the organization.

1. Click Colors on the toolbar.

2. Choose one of the pre-set color schemes.

3. Specify the color of each player element if you wish. To do this, click on the color button next to an element, select a new color and click **OK**.

Choose a color from the palette, enter its code, RGB values, or use the Color Picker tool.

The new color will be automatically applied to the selected element in the preview mode.
