

iSpring Flip User Guide

With iSpring Flip, you can quickly turn your documents into e-books, upload them to an LMS, and keep track of what learners are reading and how far they have progressed.

iSpring Flip converts your Word, PDF, or PowerPoint files into interactive HTML5 books compatible with all modern standards for e-Learning delivery: SCORM, AICC, cmi5, and xAPI (Tin Can).

With the free iSpring Play mobile app, learners can save books on their tablets or smartphones and read on-the-go — online or offline.

Basically, your interactive e-book is a complete e-Learning course: you can upload it to an LMS, share with your learners and track as they read. Detailed statistics of their reading activity will be collected in your LMS reports.
