

# Olympic Games Quiz results

A [Fiddler](#) tool was used for checking out the contents of a POST request that contains quiz results.

Here is the number of this session:

Here is the list of variables (on the right). Go to **Inspectors** → **WebForms**.

The screenshot shows the Fiddler interface with the **Inspectors** pane open to the **WebForms** tab. The **Body** section displays an XML document. The **dr** variable is expanded, showing the following XML content:
